

How to Add a New Client to the Leader CSP Portal for Microsoft Licensing

A Step-by-Step Guide for Seamless Integration

Accessing the Leader Systems Cloud Portal

Navigate to the Leader Systems cloud portal:

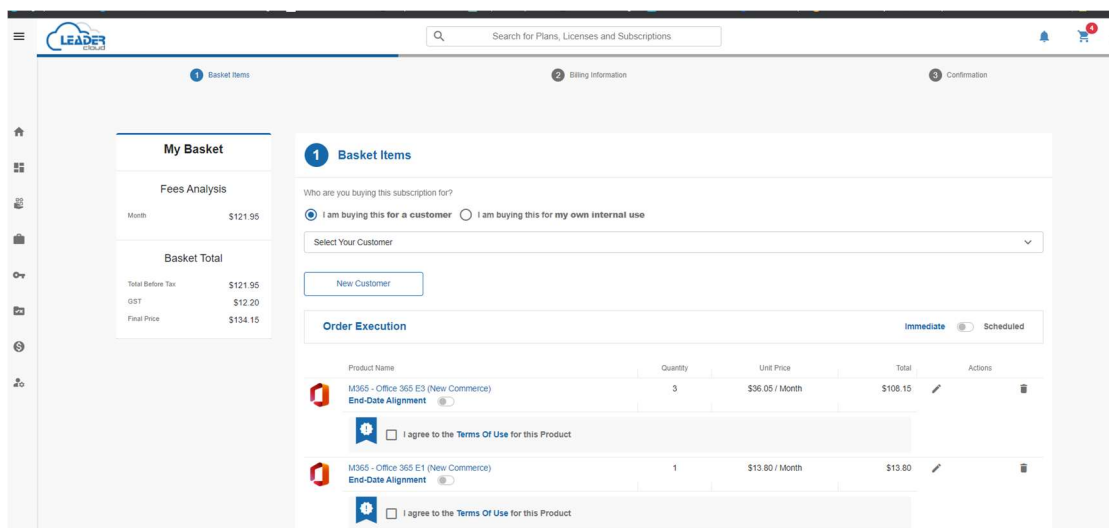

<https://hub.leadercloud.com.au/login/?refurl=%2f>

Adding Licenses

Search for the licenses you need or select from the options available at the bottom of the page.

Click on Add Licenses and proceed to Check Out.

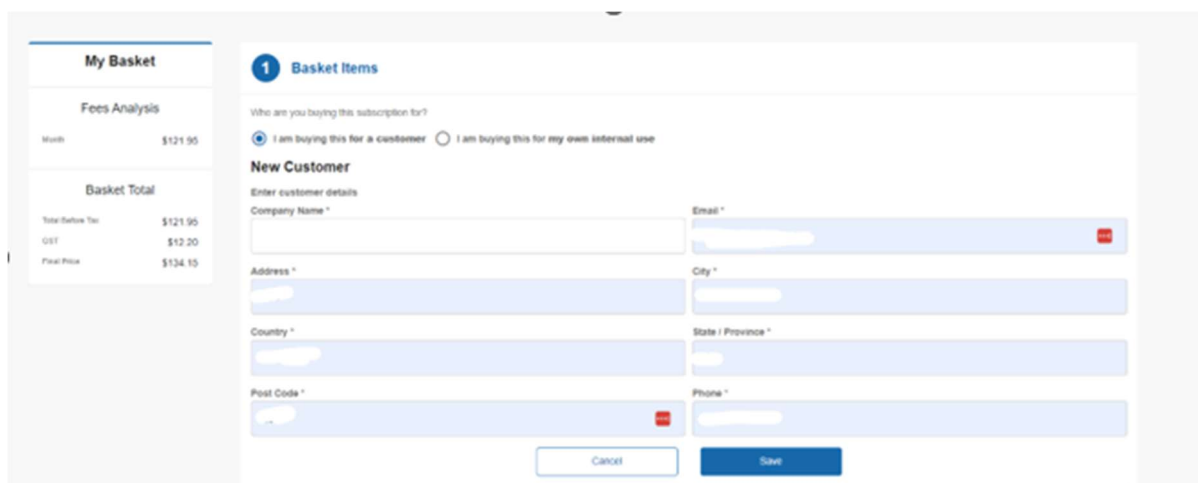

Setting Up a New Customer

On the next screen, choose New Customer.

Fill in the client's name but use your reseller information to ensure clients cannot be contacted by Microsoft directly.

Click Save and then Next. This will take you to the Service Details screen, where you can link with the client's M365 admin portal.

Verifying Domain Details

Enter the domain prefix, which can be found in the client's admin portal by navigating to Settings > Domains. For example, 360business.on.microsoft with the default domain being 360business.com.au.

☒ My customer is already using Office 365 service and he/she owns this domain

To complete this purchase, please open this AUTHORIZATION link. If you do not have a Global Administrator role, you will need to share the link with a Global Administrator.

Once the authorization process is complete, click the Verify button.

Verify Authorisation

Define Default Domain

Please add the tenant's DEFAULT domain (eg: customerdomain.com.au). If the default domain is 360business.onmicrosoft.com, please leave the field below empty.

Default Domain

Cancel Continue

*IF there is no current M365 Tenancy and a new one is required

When entering the new company's details, be sure to use the domain the business already owns. This action will initiate the creation of a new Microsoft Tenancy, assigning a unique address in the format of yourcompany.onmicrosoft.com. After completing the licensing order, you will receive an email containing the login credentials for this new tenancy.

*IF you only wanted to connect and not buy a licence

Once the screen confirmed that the customer is connected via Microsoft (the last screenshot in the earlier step), you can then exit the cart 😊

Finalizing the Process

Wait for a few moments as it connects to the client's portal. Once connected, you will be taken to the final screen.

3 Confirmation

✓ Your order submission has been completed

You are able to continue navigating as the services are being provisioned asynchronously.
Please note that you can check the provisioning status of your services anytime via the "Notification Center".

Subscriptions	Quantity	Activation Date	Billing Cycle
 360 Business - M365 - Office 365 E1 (New Commerce)	1	26/10/2023	Month
 360 Business - M365 - Office 365 E3 (New Commerce)	3	26/10/2023	Month

Allow 1-5 minutes for the licenses to appear in the client's M365 portal.
